

U.S. Serial No. 09/873,614

Attorney Docket No. P05185US1

Amendments To the Claims

Claim 1 (Currently Amended): A method for manufacturing nanostructure patterns comprising:  
overlaying a multilayer organic molecule resist on at least a portion of a-at least one parent structure selectively deposited on a substrate;  
depositing a layer over the at least one parent structure and in contact with at least a portion of the multilayer organic resist; and  
removing the multilayer organic molecule resist to leave a residual structure.

Claim 2 (Original): The method of claim 1 wherein the step of removing the organic resist is chemical.

Claim 3 (Original): The method of claim 1 wherein the step of removing the organic resist is electrochemical.

Claim 4 (Original): The method of claim 1 wherein the step of removing the multilayer organic molecule resist removes a portion of the deposited layer.

Claim 5 (Original): The method of claim 1 wherein the residual structure includes a line.

Claim 6 (Original): The method of claim 1 wherein the residual structure includes a dot.

Claim 7 (Original): The method of claim 1 wherein the residual structure includes a ring.

U.S. Serial No. 09/873,614

Attorney Docket No. P05185US1

Claim 8 (Original): The method of claim 1 wherein the residual structure includes two or more adjacent lines.

Cont'd  
C1  
Claim 9 (Currently Amended): The method of claim 1 wherein a first portion of the at least one parent structure is a first material and a second portion of the at least one parent structure is a second material.

Claim 10 (Original): The method of claim 1 further comprising imaging the residual structure with electron microscopy.

Claim 11 (Original): The method of claim 1 further comprising imaging the residual structure with scanning probe microscopy.

Claim 12 (Original): The method of claim 1 wherein the substrate is silicon.

Claim 13 (Original): The method of claim 1 wherein the organic molecule resist is a mercaptoalkanoic acid.

Claim 14 (Original): The method of claim 1 wherein the layers of the multilayer organic molecule resist are connected with ions.

U.S. Serial No. 09/873,614

Attorney Docket No. P05185US1

Claim 15 (Original): The method of claim 13 wherein each layer of organic molecules is connected with  $\text{Cu}^{2+}$  ions.

Claim 16 (Currently Amended): The method of claim 1 further comprising smoothing the at least one parent structure.

Claim 17 (Original): The method of claim 16 wherein smoothing is accomplished chemically.

Claim 18 (Original): The method of claim 16 wherein smoothing is accomplished electrochemically.

Claim 19 (Currently amended): The method of claim 1 further comprising designing the at least one parent structure to reduce result in the residual nanostructure size structure having a width less than a width of the at least one parent structure.

Claim 20 (Currently Amended): The method of claim 19 wherein the step of designing includes designing the at least one parent structure to have at least one concave segment.

Claim 21 (Original): The method of claim 1 further comprising removing a portion of the residual structure.

U.S. Serial No. 09/873,614

Attorney Docket No. P05185US1

Claim 22 (Original): The method of claim 1 further comprising:  
overlaying a second multilayer organic molecule resist on at least a portion of the residual structure;  
depositing a second layer over the residual structure and in contact with at least a portion of the second multilayer organic resist; and  
removing the second multilayer organic molecule resist to leave a second residual structure.

Cont'd  
C1  
Claim 23 (Original): The method of claim 22 further comprising smoothing the residual structure.

Claim 24 (Original): The method of claim 23 wherein smoothing is accomplished chemically.

Claim 25 (Original): The method of claim 23 wherein smoothing is accomplished electrochemically.

Claim 26 (Original): The method of claim 22 further comprising designing the residual structure to reduce the second residual structure size.

Claim 27 (Original): The method of claim 22 wherein the second layer adheres only to the residual structure.

Claim 28 (Original): The method of claim 22 further comprising removing a portion of the second residual structure.

U.S. Serial No. 09/873,614

Attorney Docket No. P05185US1

Claim 29(Original): The method of claim 22 further comprising removing a portion of a subsequent generation residual structure.

*Cont'd*  
*C1*  
Claims 30-32 (Withdrawn).

Claim 33 (New): The method of claim 1 further comprising designing the at least one parent structure to result in the residual structure being spaced more closely than the at least one parent structure.
